

RM of Lumsden No. 189
Haying in Municipal Right-of-Ways Policy

Hay along the municipal right of way is available for free salvage by farmers and ranchers. Producers may recover hay anytime during the spring or summer months, with landowners or lessees nearest/adjacent to the ditch having the first option to cut or bale this material prior to July 8. After that date, anyone may cut and bale the hay without permission from the nearby landowner, provided salvage operations haven't been initiated.

The hay must be cut at a uniform height, leaving a neat appearance and bales of hay must be placed no less than five metres away from the shoulder of the road. Bales must be removed by Aug. 8 and if any are left after that date, they may be removed by the Public Works Department.

Adopted by Council October 13, 2016
