

TOWN OF LUMSDEN

Sump Pump Discharge Rebate Application

Name:	
Mailing Address:	
Phone Number:	
Address of Home with Sump Pump:	
Year House Built:	
Date of Sump Pump Installation:	
Please describe how you have disconnected and diverted the sump pump discharge:	

Declaration:

By signing this, I declare the following information is true and accurate:

I am the registered property owner or authorized agent.

I have redirected the sump pump discharge in my home from the Town of Lumsden's sanitary sewer system to the storm water collection system.

By submitting the application and accepting the rebate, I agree to release and save harmless the Town of Lumsden from all claims, actions, causes of action, losses, damages, expenses and costs of any nature whatsoever arising from or related to participating in the municipal rebate program.

The Town of Lumsden reserves the right to reject or accept any application for the municipal rebate program.

Any qualified rebate may be subject to onsite inspection, verification or follow-up contact by the Town of Lumsden.

I agree to provide access to a Town of Lumsden for an inspection.

TOWN OF LUMSDEN

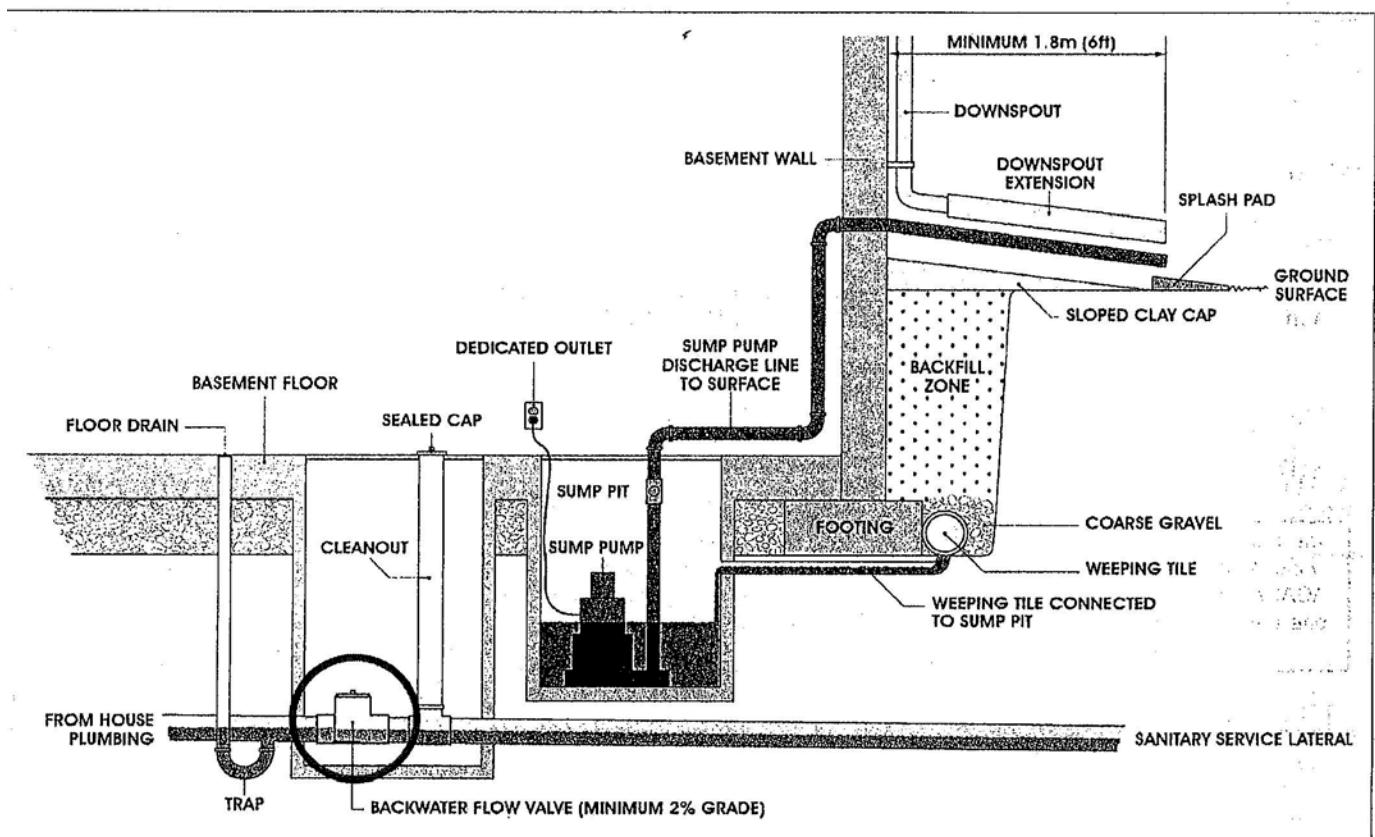

Advantages of the Sump Pump Discharge Rebate Program

The Town of Lumsden's exfiltration lagoons are operating at capacity. Groundwater adds to the loading of a sanitary sewer system through infiltration and through sump pump directed discharge. The groundwater levels have been very high over the past several years and we have seen an increase in precipitation over the past few years. Homeowners can be of great assistance by taking the appropriate action to redirect their sump pump discharge from the sanitary sewer system into the storm sewer system.

Homeowners who isolate their sump pump discharge from the Town's sewer system will be assisting in reducing the loading on the lagoons and will also be reducing their risk of basement flooding.

To assist homeowners, the Town of Lumsden is offering owners of single-family and duplex residential homes a rebate of up to \$50.00 per property to redirect their sump pump discharge to their ditches and capping the home's storm sewer or external weeping tile connection*.

The diagram below shows how water can be discharged from a basement to a ditch or street sewer, diverting the sump pump water away from the sanitary sewer system and allowing the ground to naturally filter the water.

Homeowners who qualify for the rebate may be subject to an onsite inspection, verification or follow up contact by the Town of Lumsden
